Cod: 100590012013

Stainless steel cabinet sink 50x70x85h cm 1 basin and 1 hinged door EC

Description

What could be more convenient than a complete washing station? Our stainless steel cabinet sink is a complete and practical piece of furniture for your professional kitchen. Made entirely of stainless steel, it ensures hygiene, durability and style. It can be easily and quickly integrated into the line. Choose the best and rely on Ristoattrezzature's expertise and experience. Discover our professional sink. Design and function The professional cabinet sink for catering consists of: 1 rinsing basin; 1 splashback; 1 door; 1 container compartment. The hole for the mixer tap is excluded. The structure is made entirely of 18/10 stainless steel, a robust and durable material. In fact, all our stainless steel is certified for use in kitchen laboratories and to come into contact with food. Theexternal dimensions are 50x70x85h cm, the splashback measures 100 mm, and it has a bottom shelf. The door is hinged with a removable closure. The sink has legs with a round foot that can be adjusted in height. The lines are clean and uncluttered with no hard-to-clean gaps, and the rounded inner corners facilitate cleaning and maintenance. Cleaning and maintenance Stainless steel is characterised by its ease of cleaning, which also makes it particularly hygienic. To remove stains and marks from stainless steel, a wet cloth is sufficient as it is non-porous. For cleaning the 1-bowl stainless steel sink, do not use products with chlorides, bleach, iron wool or abrasive sponges, scrapers or hard knives. Steel has a protective film that must not be damaged

or scratched. Why it is the right product for you The 1-door stainless steel cabinet sink is the ideal product for all catering businesses. Compact and modular, it is practical to install without excessive bulk. The dual function, storage and washing, makes this equipment versatile and turns the sink into a complete workstation where washing utensils are always at hand. The compartment underneath can be opened with a hinged door and the adjustable feet allow the sink to be adapted to work requirements. For more information you can write or call us.
