

Cod: 6739

Built-in static refrigerated tank 1460x380x100h mm

Description

This refrigerated tank takes up little space in height and it is possible to display products in GN 1/3 or 1/1 h=40 mm trays or directly on the perforated bottom trays. These built-in refrigerated tubs are made of AISI 304 stainless steel inside and out, with a welded and diamond-coated bottom, PVC joint profiles and body insulated with ecological low-density polyurethane. Static refrigerated tank with coil drowned inside the body, water drain and evaporator tube outlet on the bottom (valve and electrical panel excluded). Operating temperature +4°/+8° °C.
