

Cod: 7810

Stainless steel automatic cutlery dryer 1330W 48x38x55 h cm

Description

Automatic machine suitable for drying and polishing cutlery that has just been washed in the dishwasher, the food-grade granulate absorbs residual moisture and, by vibrating, polishes the cutlery without leaving any residual dust. 90° at the bottom of the tank for sterilisation. The basket, containing 50/60 pieces of cutlery, automatically plunges into the tub containing the hot, vibrating granular; the drying cycle takes only 2 minutes, the hourly output is about 2000 pieces. A 6 kg load of granular is included in the scope of delivery, more granular, the lid and two types of trolley can be purchased separately.
