## Josper HJX50M bench-top oven

### Description

Josper elegantly fuses the characteristic aspects of the oven and grill in one machine. Intended for a particularly demanding environment such as the HORECA sector, Josper is equally appreciated by steak houses, restaurants specialising in grilled meat, tapas bars, bistro-café, traditional restaurants, haute cuisine restaurants, etc. It works 100% with charcoal. Unique covered barbecue design. Various levels of barbecuing. Front door, light and robust, easy to handle. Temperature control through an articulated draft system. What benefits does it offer and how does it differ? Excellent results with any food: Its high working temperatures allow food to be roasted and toasted over embers without boiling it. First-class charcoal cooking: Gives food the unmistakable flavour imparted by the noble character of wood and ensures a unique texture and juiciness. Faster: 35% faster than an open grill. Dual oven and grill function: Two machines in one. Lower coal consumption: Consumes over 40% less coal than an open grill. Reduction of flames: Thanks to the considerable reduction in flames, food is prevented from drying out or burning. Better working conditions: The cook is safe from the impact of constant heat. Improved hygiene: Ash collects in a tank located in the closed cabinet below the cooking chamber. Personalised service: We have a worldwide network of official distributors and experienced chefs, designed to facilitate commissioning, guarantee advice and provide after-sales service. Amazing

josper HJX50M counter-top charcoal oven, ignition time approx. 40 min. The oven has a daily charcoal consumption of 16 to 20 kg (on average) and an operating time of 9 hours.
