

Cod: 8239

Beer counter 2 keg doors with motor unit with rear grey 900 x 660 x 1128 mm

Description

Beer counter with motor unit designed for cooling drinks kegs, especially for cooling unpasteurised beers . The kegs are stored at a temperature of approx. 3°C. It is equipped with a so-called cold keg system that offers several advantages ease of installation of the counter, in fact it only needs to be recessed and positioned; saving of carbon dioxide as very little Co2 is needed to push the beer to the tap where it will then be cooled; better quality of the beer served thanks to the very little carbon dioxide used; possibility of prolonging up to 4 weeks the maximum period of use of an open keg, before having to replace it even if it is not used up; rapid keg replacement operation. Accessories available as optional extras and a choice of two variants.
