

Cod: 8602

Semi-automatic Sicilian arancini machine

Description

Semi-automatic machine for making Sicilian arancini, supplì and potato croquettes. This is a machine (column) designed to optimise the use of the arancini mould without the use of motors or other electrical elements. It has been designed with the precise aim of facilitating small and medium-sized workshops in the production of typical Sicilian arancini, guaranteeing: Possibility of installing different moulds to make many shapes and weights; Minimises the user's effort; Handmade arancino quality, with the rice grain always intact; Extreme ease of use; ZERO maintenance; The materials used are stainless steel, high resistance plastic material, suitable for contact with foodstuffs.

Dimensions

Dimensioni esterne	240x240x630 mm
