

Cod: 2699

TOP Electric Ceramic Glass 2 Plate Cooker

Description

Electric Ceramic Glass 2 Plate TOP Cooker. Stainless steel construction. Thermosetting plastic knobs. Glass-ceramic plate of adequate thickness for heat transmission. Dedicated cooking zones highlighted on the worktop. Heat intensity adjustment by means of an energy regulator that modifies the working time of the special infrared heating element located under the glass-ceramic plate. Safety thermostat with automatic reset against overheating of the glass ceramic plate. Perfectly smooth glass-ceramic surface for easy cleaning. Large work surface: moving pans is quicker and more convenient. Continuous adjustment of heating power.

Dimensions

Dimensioni esterne	400x900x250 mm
