

Cod: 9357002001

Closed motorless deodorising filtration unit flow rate 1400 m3/h 5 cartridges

Description

The unit is designed for filtering and deodorising action thanks to the presence of active carbon filters. The load-bearing structure is made of extruded aluminium profiles, closed by galvanised sheet metal panels, lined on the inside with sound-absorbing sponge, 5 mm thick, fireproof cl.1. The filtering effectiveness is guaranteed by a first pleated textile filter class G3 and by the subsequent action of the activated charcoal cartridges. Number of cartridges inside 5.
