

Cod: 9357003002

Deodorising filtration unit without closed motor capacity 2500 m3/h 9 cartridges

Description

The unit is designed for filtering and deodorising action thanks to the presence of active carbon filters. The supporting structure is made of extruded aluminium profiles, closed by galvanised sheet metal panels, lined inside with sound-absorbing sponge, 5 mm thick, fireproof cl.1 The filtering effectiveness is guaranteed by a first pleated textile filter class G3 and by the subsequent action of the activated charcoal cartridges. Number of cartridges inside 9.
