

Cod: 9444

## Single-phase floor ripening vat 1 kW

### Description

The maturation vats are designed to offer the professional an answer to the demands of quality and hygiene in the treatment of all mixtures. The electronic control panel allows maximum ease of use of all functions. The product has an automatic storage cycle at 4°C, automatic agitation in the centre of the tank with cyclic function during storage, a monobloc steel tank for maximum hygiene and practicality, a drain tap with independent washing system that allows cleaning after each draw of the mixture, a distance from the ground of the tap such as to allow the use of high capacity containers, a steel agitator with quick coupling that can be completely disassembled for perfect hygiene and precision control of the temperature in the tank carried out by means of an electronic probe.

### Dimensions

Dimensioni esterne	400x1080x1080 mm
--------------------	------------------

### Technical data

Alimentazione	Electric
Condensazione	Air
Frequenza	50 Hz
Peso	105 kg
Portata massima	60 kg
Portata minima	20 g
Potenza Elettrica	1 kW
Voltaggio	230 V
