**Stainless steel ozone sanitising refrigerator cabinet 1 door 700 lt -6 +40 °C
720x800x2020h mm**

Description

A new line of cabinets has been created for maintaining temperature and for sanitising both foodstuffs and instruments and objects of various kinds by generating ozone. The product is highly efficient with low environmental impact and features 60 mm insulation and a R290 natural gas refrigerating unit. The -6+40 version, being a combined version, in addition to all the advantages of the cold version, i.e. preserving fruit and vegetables and all loose foodstuffs that could be contaminated for a long time, is useful for regenerating foodstuffs, warming dishes, but also for sanitising instruments, cutlery and any object that needs sanitising. Supplied with 3 sets of grids and door rails.
