## Refrigerated display case for condiments, pizza crusts GN 1/3 1400x395x435h mm +2 +8 °C with energy-saving right-hand motor

### Description

Create a complete and efficient workstation in your pizzeria by choosing the refrigerated condiment display case, pizza tin display case that best suits your needs. Ristoattrezzature's display case integrates compartments to hold up to 6 gastronorm 1/3 stainless steel or polycarbonate condiment trays. Thanks to the compact design and built-in cooling system, ingredients will always be fresh and at hand for the pizza chef. This ensures optimisation and perfect organisation- everything you need in the kitchen. The refrigerated sauce and pizza cabinet can be widely used not only in pizzerias but also in restaurants, fast food outlets, delicatessens and sandwich shops. Thanks to its free installation and versatility, you can easily move it around and decide whether to place it on a workbench or refrigerated counter. Design and operation The refrigerated condiment display case for pizza is characterised by a functional and essential design. The dimensions of the display case are 1400x395x435h mm to have everything you need in the kitchen at hand and with minimum space requirements. The 6 GN 1/3 pizza trivets can be placed in the display case quickly and conveniently, thanks to an easy installation method. Protective glass panes installed along three sides ensure optimal ingredient preservation, while both inner and outer surfaces are made of high-quality stainless steel. An ideal material when it

comes to safe food handling: strong, durable, and additionally easy to clean. In short, you can ensure high performance with style. The temperature is positive and has a range of +2 and +8 °C, and can be easily adjusted thanks to a Dixell electronic controller with temperature display. Complete your work area by taking advantage of the design that is compatible with all popular standard kitchen workbenches for gastronomy. Refrigerated condiment display case: temperature and maintenance The refrigerated condiment display case is solid and resistant, ready to withstand the heaviest workloads, even at high temperatures. Its functional and essential lines make it easy to maintain: the inside corners at the bottom are rounded. No hard-to-reach corners, so with our display cabinet, cleanliness comes first to ensure hygiene and durability of the equipment. The motor unit is built-in and can be seen to the right of the display case with a voltage of 230V at a frequency of 50HZ. Keep the temperature under control thanks to a digital thermometer and set it according to the room temperature. Why it's the right product for you Keeping food temperature under control is a very important action in the kitchen. Choosing the right accessory is a decisive choice. Ristoattrezzature's refrigerated condiment display case, pizza trivet is ideal for several reasons. It is a tool that is versatile, -compact easy to clean. Refrigeration is ensured in a completely natural way thanks to the R600a refrigerant gas. An ecological source that ensures excellent energy yield: it saves on energy bills and respects the environment. Not only that, the excellent value for money of this accessory will allow you to build your professional kitchen in a sustainable way. Compare availability on the site and find out more.
