

Cod: 9560174158

Fry top gas grill on cabinet, smooth plate 900x900x900h mm 25 kW

Description

- It is equipped with an overflow tank for the best cleaning in the shortest time.
- The tank can remain open at a trickle to replenish evaporated water or at a more consistent flow to keep the water clean of fat and cold enough not to evaporate.
- It can be configured in 4 functions by simply 'placing' the accessories on top of the hob without the need for a factory set-up.
- Accessories can be purchased separately.
- The functions are: > Direct exchange grill > Hotplate > Braising pan
- All versions have a temperature range of 220° to 380°C.
- For thick or particularly fatty meats, it is advisable to use the direct grill set-up at 220°/250°C. This guarantees even cooking without burning.
