**4-sided glass refrigerated pastry display case white 58 lt 0 +12 °C
42,8x38,6x81h cm**

Description

Ristoattrezzature's white refrigerated display case for pastry shops is a professional machine that is also ideal for supermarkets and bars. Inside you can store canned and glass drinks, cakes and pastries at a positive temperature. Thanks to the presence of no less than 4 tempered glass panes on all sides, this refrigerator also has a display function that can enhance the appearance of your preparations. Ideal to be placed in the hall, it facilitates the customer's choice and fits perfectly in any environment. Design and function Made of elegant white ABS, our display cabinet has a minimalist and professional design. The 4-sided tempered glass gives light to the products placed inside, while the ABS is a guarantee of resistance. It is in fact a polymer that resists humidity and low temperatures, ideal for use in professional refrigeration. The capacity of this refrigerated display case for pastry shops is 58 litres: a spacious and robust piece of equipment designed for medium to large premises. Robust and able to withstand heavy workloads, the refrigerated display case for restaurants and pastry shops is adaptable to all types of furnishing. Thanks to the hinged glass front door, you can easily insert and remove products. The temperature can be adjusted by means of a digital thermostat from 0° to +12 °C and can be monitored via the practical LCD display. To provide a more complete overview of the products

inside, the refrigerator is equipped with internal LED lighting and two large plastic-coated grids. These measure 355x310mm each and are adjustable. The machine is electrically powered with a voltage of 230V and a power of 0.19 kW. Refrigeration is ventilated and is operated through an internal evaporator that distributes the cold evenly throughout the refrigerator. The product measures 428x386x810 mm and has a total weight of 32 kg. Cleaning and maintenance Ristoattrezzature's refrigerated display cabinet defrosts automatically, ensuring optimal performance without manual intervention. The condenser is maintenance-free and condensate is removed through an external pipe. Periodically it is necessary to empty the refrigerator display case and clean it internally: remove the grilles and clean them with a soft cloth, wash the tempered glass with warm soapy water. Carefully wipe the glass parts to prevent halos from forming. Why it is the right product for you The 58 litre refrigerated display cabinet is ideal for pastry shops as well as restaurants. It is a dual-purpose machine: it keeps your food fresh and ensures maximum product visibility. Choose it for its robustness and large capacity, making it a great companion. The minimalist design, with adjustable feet, makes it a product that adapts to any space and furnishing context. The pastry display cabinet is classified in band C and ensures low annual consumption, only 1013 Kwh. Its sustainability is not only in its consumption but also in the refrigerant gas it uses, R290. A 110% natural gas that does not damage the ozone layer, is non-toxic and boasts excellent thermodynamic properties. Buy your white pastry display cabinet online and remember that after transport you must leave it in an upright position for at least 3 hours. This will facilitate the settling of the refrigerant gas.
