

Cod: 3218

3-cylinder refiner

Description

Robust and reliable 3-cylinder refiner. The gears and worm gears are in an oil bath, made of high-strength materials. The cylinders are made of light granite, one of which is horizontally oscillating for perfect product refining. This 3-cylinder model mounts rollers 350 mm wide. It is very easy and practical to remove the scrapers and hopper for cleaning. It is complete with accident prevention devices in accordance with the law. The collection tank and loading hopper are made of stainless steel.
