Refrigerated counter display 76.7x61.2x32.8h cm 8 gn 1/6 +2 +12°C

Description

Refrigerated counter display unit for yoghurt shops, bars, restaurants Ristoattrezzature ideal for containing creams, fruit, vegetables and condiments. Also included are 8 gn 1/6 trays to keep your food fresh at all times. Mounted on a cabinet or workbench, the display unit provides valuable support for both food preparation and customer service. Its versatility and low weight make it easy to install and move. Design and operation Therefrigerated counter display cabinet has an all stainless steel structure of high quality and resistance, perfect for ensuring professionalism and hygiene. The upper glass, which protects the ingredients from contamination, has a curved design and thanks to the springs that regulate its opening, it is easy to lift and close automatically. The curved corners and steel surfaces make it easy to clean the equipment, which thus remains always ready for use and perfectly performing. Refrigeration is static with a positive operating temperature that can be adjusted in a range between +2°C and +12°C. The digital thermostat is located on the underside of the display and the gradation can always be seen and monitored via the display on the front. Speaking of dimensions, this refrigerated counter display unit measures 767x612x328 mm externally for an overall packaging size of 840x690x390 mm. The capacity is 67 litres, which is considerable if we consider that its dimensions remain small and practical. The power supply is electric with climate class 4 and energy class D. The refrigerant

gas used for cooling is R290 Cleaning and maintenance Thanks to the automatic defrosting, cleaning the display cabinet is made easy. The No Frost system is a mechanism that regularly defrosts the evaporator, so you do not have to switch off your refrigerated counter display to defrost it. Product efficiency will also be improved due to the absence of insulating layers on the thermal elements. Above all, thanks to this function, you will not risk finding frost deposited on your food and you will have greater odour control. The high quality stainless steel of which this refrigerated food display cabinet is made ensures maximum cleanliness and hygiene; just clean it regularly with a non-aggressive detergent and avoid any type of acid that could damage its surfaces. All you need is a dry cloth to dry all its parts and reassemble it. Why it is the right product for you Practical to install and compact in size, this refrigerated counter display is ideal for all catering sectors that need to control the temperature of food in the kitchen as well as in the dining room. Perfect as a condiment and sauce rack, this product can be placed in any working environment by simply installing it on a flat stand. The metal feet ensure proper friction and maximum stability. Buy it online and receive it already complete with its 8 gn 1/6 trays, it will ensure maximum efficiency, robustness and low consumption. In fact, the R290 refrigerant gas guarantees good energy performance and respect for the environment, thanks to its 100% natural origin.
