

Cod: 3447

Manual thermosealing machine 315x450x555h mm

Description

Machine designed for packaging in pre-formed trays of different sizes with compatible sealing films. Small overall dimensions. Made of stainless steel and anodised aluminium. Teflon-coated aluminium sealing plate. Five memorisable sealing programmes. Electronic soldering plate temperature control (0-200 °C). Acoustic and luminous end-of-cycle warning. The film cover reel is placed over the front of the machine and unwinding takes place automatically during manual insertion of the tray mould. The sealing of the film on the tray is done with a slight pressure on the lever. The film and moulds, to be chosen according to the model and format of trays to be sealed, must be matched to the tray sealer.

Dimensions

Dimensioni esterne	315x450x555 mm
