

Cod: 3448

Semi-automatic thermosealing machine 295x450x555h mm

Description

Machine manufactured for packaging in pre-formed trays of different sizes with compatible sealing films. Small overall dimensions. Made of stainless steel and anodised aluminium. Teflon-coated aluminium sealing plate. Five memorisable sealing programmes. Electronic soldering plate temperature control (0-200 °C). Acoustic and luminous end-of-cycle warning. The cover film reel is placed over the front of the machine and unwinding takes place automatically during manual insertion of the tray mould. The sealing of the film on the tray is performed automatically with the closing of the mould with drawer slide. The film and the moulds, to be chosen according to the model and format of trays to be sealed, must be combined with the thermosealing machine.

Dimensions

Dimensioni esterne	295x450x555 mm
