Stainless steel 2-door refrigerated freezer cabinet 1400 l -18 -22°C ventilated - EC

Description

The single-door stainless steel ventilated freezer cabinet from ristoattrezzature.com with a gross capacity of 1400 litres and a net capacity of 1300 litres has an external and internal structure made entirely of stainless steel. The freezer is also adjustable in height thanks to the presence of feet. The interior of the freezer has rounded corners to facilitate cleaning and thus offer practicality and hygiene in use. Refrigeration is ventilated and therefore cold is produced by an external evaporator with anti-corrosion treated fins. The anti-corrosion treatment is designed to prevent oxidation that would form as a result of the formation of frost/condensation in normal refrigerator operation. The cabinet has a spring-return door, key lock, door gasket that can be removed without tools, interior light, bottom with rounded corners, outer bottom and back panels in galvanised sheet metal.
