## Display saladette refrigerator counter with straight glass and intermediate shelf 3 doors 136.5x70x85h cm

### Description

Spacious and ideal for delicatessens and canteens, the **display saladette refrigerated counter** is professional catering equipment designed to **store and display** food.

It consists of two parts: one in stainless steel with **3 refrigerated doors** and one in glass for display purposes. **The display case is upright with a shelf.**

Designed to be placed in the dining room, the professional refrigerated counter is intended to keep ready preparations fresh and provide a complete and detailed view to customers.

### Design and operation

The design of our display saladette refrigeration counter is clean and straightforward to ensure easy cleaning and convenient installation. The **stainless steel structure** ensures robustness and heat retention due to its thickness and features **3 doors with ergonomic handles**. The doors

close automatically and the presence of gaskets limits energy loss while ensuring a stable temperature.

The **open top** is designed to accommodate standard GN deli trays. The machine can accommodate:

- **4 GN 1/1 trays**

or

**1 gn 1/1 tray + 2 gn 1/2 trays + 3 gn 1/3 trays + 2 gn 1/2 trays**

The trays are **not included and can be purchased in the optional section.**

In the upper part we find the display area made entirely of **straight tempered glass** that allows a panoramic view of the product while ensuring a good thermal seal. The display case includes a fixed, non-adjustable **intermediate shelf**.

In terms of overall dimensions, **Ristoattrezzature's display saladette refrigerator counter measures 1365x700x850h mm** for a capacity of **368 litres**.

Convenient dimensions that also meet the needs of medium-large businesses. In the machine, the **motor is incorporated and refrigeration is static**. Cold is generated through a plate inside the chamber and progressively propagated by radiation.

The fan in the refrigerated display case **ensures the same temperature for all preparations**. Its action **equalises the temperature in the chamber**.

**The operating temperature is adjustable via a digital thermostat** and can be set between **+ 2° C and + 8° C**. The gradation can be monitored on a display on the bottom, where the power button is also located.

The saladette cooler is electrically powered with a **power of 0.28 kW** and a **voltage of 230 V**.

## **Cleaning and maintenance**

In order to keep our display saladette refrigerator counter performing at all times, it is necessary to carry out **regular and careful cleaning**.

First of all, **unplug the power socket** and clean all container compartments and trays with a **soft cloth and mild detergent**. Chlorinated abrasive detergents or acids would irreparably damage the protective film of the stainless steel. Also carefully clean the door gaskets with **warm soapy water**, taking care to dry them thoroughly. Each separately purchased tray has rounded corners for easy cleaning.

For the maintenance of stainless steel, remember **never to leave dirt stains on steel parts** or water or other liquids for **too long**. When sanitising it, **never use abrasive scouring pads** or other tools that could scratch it.

## **Why it is the right product for you**

**Spacious, practical and comfortable** to use, the display saladette refrigerator counter is a **high-performance and capacious machine**. The large glass windows offer excellent visibility to the preparations, keeping them always at the right temperature. Not only that, the internal

organisation it offers **ensures hygiene and order both through the various trays and by taking advantage of the additional shelf.**

Excellent value for money and low consumption. Finally, the refrigerant gas used, **R290**, ensures excellent thermodynamic performance and **respect for the environment**. The source is completely natural and does not damage the ozone layer.

**Buy the display saladette refrigerator counter** for your premises, ideal to be placed in the hall and perfect for **delicatessens, sandwich shops and fast food** outlets.
