Stainless steel cupboard table 140x70x85h cm with 2 sliding doors EC

Description

Resistance, hygiene and considerable capacity. The stainless steel cupboard table with 2 sliding doors for the kitchen is the ideal professional kitchen equipment to complete your kitchen décor with functionality. An indispensable element in small and large kitchens, where tables are usually subjected to a heavy workload. Use the top shelf to work your dough and the space below to store all your equipment. Choose the professional tool best suited to your needs by relying on Ristoattrezzature's experience and professionalism. Organise your work line efficiently. The use of the stainless steel cabinet table with 2 sliding doors is recommended in every area of the catering industry and particularly suitable in pastry shops, pizzerias, butcher's shops, dairies, ice-cream parlours and kitchen laboratories. Design and function The stainless steel cabinet table with 2 sliding doors for pastry shops features a technical design with essential lines. The table fits easily into any work environment and style. The robust and durable construction guarantees optimal performance over time. The AISI 304 stainless steel selected for its construction meets the highest safety standards and is perfect for working in contact with food. A hygienic, chemical-resistant and corrosion-resistant material, it is precisely in catering that it finds its greatest use. The worktop is reinforced with a water-repellent bilaminate chipboard. The part underneath, on the other hand, is designed to hold and store food or professional equipment that is rarely used. It

consists of a bottom shelf and a height-adjustable middle shelf and closes with 2 practical sliding doors. It is completed with 4 square tube legs and adjustable feet: ideal for meeting the professional needs of the individual operator. The external dimensions are 140x70x85h cm. The height of the splashback is 100 mm: essential to prevent dirt from reaching the walls of your kitchen. Cleaning and maintenance The innovative construction systems used in the construction of the stainless steel cabinet table with 2 sliding doors guarantee fast cleaning and easy maintenance. To avoid food contamination and to ensure constant hygiene, we recommend cleaning the worktop after each use. It will be essential to use a soft cloth to avoid scratches, hot water and mild detergents. For maintenance, on the other hand, the easy-to-remove sliding doors allow for quick and precise intervention when needed. Why it's the right product for you The stainless steel cabinet table with 2 sliding doors for restaurants is an indispensable element in both small and large professional kitchens. Its modularity allows you to place other professional equipment alongside it and complete the work line in a practical and efficient manner. The possibility of adjusting the height of the shelves and feet at the base makes it easier to handle heavy workloads. Sliding doors provide storage space that is fully protected from external influences. The stainless steel cabinet table with 2 sliding doors is the perfect choice in the kitchen because: Robust Durable Spacious Safe Reliable. Excellent value for money. Consult the online catalogue and complete the look of your table by selecting the available options. Read the technical data sheet for all product details.
