Three-phase electromechanical dishwasher with 50x50 cm square basket rinse aid dispenser installed

Description

Professional three-phase dishwasher. When the need arises for a machine with a large washing capacity in a limited space, consider a dishwasher with a 500x500mm basket. These machines are perfect for restaurants, small hotels and nursing homes. The product can be connected to either cold or hot water, in the latter case the washing cycle will last less time.

Strong points:

- Made of stainless steel with electromechanical management
- Suitable for use in public environments such as bars and restaurants
- Equipped with a 50x50 cm square basket
- The impellers and washing jets perform a high-performance action, to obtain perfectly clean dishes on any occasion

- Made with special heating elements that offer a significant reduction in consumption and current

Standard equipment: 1 dish basket, 1 glass basket and 1 rinse aid dispenser

Optional extras to choose from: Detergent dispenser and drain pump

N.B

The product is supplied without a drain pump. If you have the outlet on the wall and not on the floor, you will need to purchase the drain pump together with the machine; another solution would be to raise the machine by means of a support so as to keep it higher than the outlet. The drain pump can however be purchased at a later date and installed by your technician at your own expense.

WARNING: with floor drainage and the right slope you **DO NOT NEED THE EXHAUST PUMP**. If, on the other hand, the drain hole in the wall is more than 10 cm, the drain pump is required.
