

Cod: 11063004001

Detects counterfeit banknotes IR - MG - MT - SD checks with display

Description

It detects counterfeit banknotes in a modern design with improved testing sensors. Banknotes can be easily and quickly checked directly at the cash point. Suspicious bank notes are signalled by the LED, LCD display and an audible warning signal and are ejected from the opposite side to the real ones. The detector with automatic currency recognition also has a counting function and can determine the quantity and total amount of tested banknotes.

Certified by the ECB.
