

Cod: 11145039419

Multifunctional touch food processor 1.6 kW power and 3.3 l capacity

Description

Multifunctional food processor with 37 functions: chopping, mincing, centrifuging, chopping, sautéing, grinding, pulverising, grating, heating, blending, yoghurt function, whipping, emulsifying, stirring, cooking, spinning, steaming, simmering, confit, kneading, low-temperature cooking, boiling, keeping warm, fermenting, SlowMambo, cooking with degree-by-degree precision, simmering, slow cooking, speed zero and turbo function, stew, bake, chop, blend and clean automatically, timer and screenblock. New 5" colour TFT Softouch display for greater convenience Change accessories in seconds with the OneClick system. Now you can change accessories without removing the jug from the robot. Enjoy the Smartphone App with unlimited step-by-step guided recipes, preset modes to make it easy to use and manual DIY system. Incorporates a scale to accurately weigh the food placed in the carafe in order to process exact quantities and achieve excellent results. Additional stainless steel Habana carafe with extremely non-stick ceramic coating for excellent results in the most delicate preparations. Ideal for risottos, desserts, creams, stews, doughs... High-quality stainless steel carafe dishwasher-safe. Its zero speed cooking and sautéing without the need to speed up as in a saucepan or frying pan. Plus, with the advantage of cooking without a lid. The sauté function allows you to cook at a higher temperature when you want to use it to brown food, achieved with the higher temperature and

power. Exclusive kneading spoon. You can obtain homogeneous doughs with greater volume without breaking the dough. The carafe has a large capacity of up to 3.3 litres so that you don't have to repeat processing when there are guests at home. Boiling basket so you can prepare up to 4 dishes at the same time. Cooking in the two-tier jug, basket and steamer is ideal for saving time in the kitchen. Includes access to recipe book, interactive social community and all new recipes of the week. The intelligent heat output system oscillates from 0 to 10 levels simulating a traditional fire with low, medium or high flame. It prevents overheating and prevents food from sticking or burning. Dual gear motor that effortlessly utilises its full output at high and low speeds. SlowMambo movement that allows you to cook at a low temperature while constantly spooning in the traditional way. Get more intense flavours. The dosing cap is fitted with a safety lock specifically for chopping or turbo charging without the risk of splashes. Fully customisable in all parameters to offer endless possibilities in everyday cooking. You can program the time, speed, temperature, heat and turbo power as you wish. The butterfly has a silicone reinforcement at the end for better results. It incorporates a two-level steamer with a large capacity for unlimited steaming. The accessory assembles without the jug lid so you can steam a larger surface area. Large, highly intuitive digital display with touchscreen control panel for better use. Features 10 speeds and adjustable timer from 1 second up to 12 hours. The temperature is adjustable degree by degree from 37 °C to 120 °C. Silicone-covered spatula to help easily extract all the processed food from the carafe or turn if necessary. New lid design with locking system. While the motor is running, the carafe and lid are locked.

Dimensions

Dimensioni esterne	445x290x325 mm
