Electric cooker 6 round plates with ventilated electric oven 19.25 kW 120x70x85h cm

Description

6-burner electric cooker with ventilated electric oven, stainless steel construction. Knobs made of athermal material with functional serigraphy on edge. Moulded, double-walled oven door and elliptical-shaped AISI 304 handle.

Heating by means of **electric round cast-iron plates**. Heating element fixed on the bottom of the plate, embedded in a layer of insulating material. Each plate is equipped with a switch that allows the power to be adjusted **from maximum to minimum in seven positions**. Safety is guaranteed by a temperature limiter placed inside the hotplate.

Moulded AISI 304 stainless steel worktop with an inverted counter-buttering to ensure perfect plate housing, easy cleaning and to protect electrical components from overflowing liquids. Front cover in AISI 304 stainless steel.

Ventilated electric oven 1/1 GN and open compartment. Thick steel oven floor reinforced with a series of ribs. Removable stainless steel oven grate.

Insulation of baking chamber and oven door ensured by a layer of ceramic fibre resistant to high temperatures.

Oven heating by means of special **high-temperature-resistant steel heating elements placed under the sole and in the baking chamber ceiling**. Air movement guaranteed by a **stainless steel fan** driven by a powerful electric motor. Equipped with a thermostat that allows the temperature to be adjusted between 90°C and 300°C. Safety thermostat with manual reset against overheating. Possibility of selecting various types of heating, both static and ventilated, both diffusive heating from below and global heating.

Laser-cut top finish to ensure "head-to-toe" coupling of tops and binding of tops to each other.

Height-adjustable stainless steel feet.

Dimensions

Dimensioni esterne	1200x700x850 mm
