## 3 litre counter-top electric fryer single basin black single-phase 2 kW

### Description

The luxurious fryer has an elegant black body that blends in perfectly with any décor and also hides oil splashes. The large capacity of 3 litres makes it possible to fry chips and snacks for the whole family. The fryer also includes an adjustable thermostat up to 190 °C, so you can always cook at the healthiest temperature.

### Cold zone for healthy frying

A problem with many deep fryers is burning crumbs that fall through the basket when you use the oil more than once. The fryer has a special cold zone that prevents this from happening. All small particles end up in the cold zone under the heating element and do not burn. This way, the oil stays clean much longer and you will not find black remains in the chips

### Easy to clean

The fryer's stainless steel inner container can be removed for easy cleaning and changing the oil. All parts of the fryer are removable and most are dishwasher-safe, so you can clean the machine in a jiffy. In addition, the frying basket handle can be closed for easy cleaning and storage.

**NB: Non-professional equipment.**

### **Dimensions**

Dimensioni esterne	260x412x220 mm
--------------------	----------------

### **Technical data**

Alimentazione	Electric
Capacità	3 Lt
Frequenza	50/60 Hz
