

Cod: 11238004033161

3+3 litre counter-top electric fryer double bowl single-phase 3.6 kW

Description

Double the frying and prepare fish and chips for the whole family at once with this powerful double fryer. The fryer heats up very quickly thanks to the high power of 2 x 1800 watts. Both containers share the same plug, but can be used separately.

Cold zone for healthy frying

A problem with many deep fryers is burning crumbs that fall through the basket when you use the oil more than once. The double fryer has a special cold zone that prevents this from happening. All small particles end up in the cold zone under the heating element and do not burn. In this way, the oil stays clean much longer and you will not find black remains in the fries.

Single-plug system for greater safety

The double fryer has only one power plug and requires only one wall socket to operate. The two heating elements are connected to each other and can be easily removed. In addition, the fryer has two separate thermostats that allow you to control each unit independently and cook chips and fish, or snacks at the same time, at the ideal temperature.

Easy to clean

The fryer's enamelled inner receptacles can be removed for easy cleaning and changing the oil. All parts of the fryer are removable and most are dishwasher-safe, so you can clean the machine in a jiffy. In addition, the handles of the frying baskets can be closed for easy cleaning and storage.

NB: Non-professional equipment.

Dimensions

Dimensioni esterne	425x405x265 mm
--------------------	----------------

Technical data

Alimentazione	Electric
Capacità	6 Lt
Frequenza	50/60 Hz
Peso	1 kg
Potenza Elettrica	3.6 kW
Temperatura d'esercizio	0 +190 °C
Voltaggio	230 V

Standard equipment

In dotazione	2 cestelli con impugnatura e 2 recipienti smaltati removibili
