## Table-top electric barbecue with stand 2 kW 44.7x35.5x71h cm

### Description

Enjoy a nice barbecue in the garden with your family or friends with the Electric BBQ. Connect the power cord and you're done! With 2000W power, it heats up quickly and you can grill meat, fish or vegetables in minutes. Grease and juices collect in the metal collector, so the BBQ produces less smoke and only takes a few minutes to clean up. Don't feel like standing at the barbecue while your friends eat at the table? Then use the barbecue as a tabletop model and enjoy a delicious dinner with them!

### Grill meat, fish and vegetables

The electric barbecue has a spacious 36.5 x 25.5 cm cooking grill, so you can grill different types of meat, fish and vegetables at the same time. Thanks to the infinitely adjustable temperature, you have easy control over the grilling process and can cook even delicate foods such as fish more easily. The barbecue also has two convenient side shelves where you can store your barbecue tools. This way you have everything at hand for a delicious barbecue.

### Easy to transport on the go

Enjoy the easiest way to barbecue on holiday. Thanks to the included stand, the barbecue can be

used either standing or as a tabletop model. In addition, the grill is easy to move thanks to the integrated handles. Thanks to its 2000 watts of power, the barbecue quickly reaches the right temperature so you can start almost immediately. The heat-resistant housing ensures that the outside does not get hot and the barbecue can therefore be placed on a table.

### **Easy to clean**

The electric barbecue is very easy to disassemble completely so you can put the grill and grease collector in the dishwasher and clean the grill easily. The barbecue has a special metal water container in which the grease collects. As the grease falls into the water, less smoke is released. No matter which way the wind is blowing, you are always in the right place!

**NB: Non-professional equipment.**
