Electric grill with open compartment 8.2 kW 80x70x85h cm

Description

Direct electric grill on open compartment, stainless steel frame. Knobs made of athermal material with functional screen printing on edge.

Heating by means of **AISI 304 sheathed** heating elements, which work in air and are suitable for the temperatures to which they are subjected (400°C). The heat load of the heating elements is such that **heat exchange is only towards the food** to improve cooking and energy saving. Safety thermostat with automatic reset to protect the heating elements. Energy regulator that adjusts the ON-OFF frequency of the heating elements. The maximum continuous operation position is useful in the cleaning process, as it induces pyrolysis of the fats deposited on the heating elements.

Removable AISI 304 cold-pressed water holding **tank** with drain hole. The water improves the quality of the cooked food and conveys cooking fat to the drain.

AISI 304 stainless steel worktop with **removable 1/1 GN Gastronorm pan** with rounded edges for easy cleaning. Stainless steel front, side and rear panelling.

Laser-cut top finish to ensure a "head-to-head" matching of tops and binding of tops to each other.

Height-adjustable stainless steel feet.

Dimensions

Dimensioni esterne	800x700x850 mm
