## Gas fryer on cabinet 1 basin 15 lt with electronic controls 40x70x85h cm

### Description

Gas fryer on 1-bowl cabinet, stainless steel structure. Knobs made of athermal material with functional serigraphy on edge. Oil heating by combustion-optimised stainless steel burners equipped with a heat exchanger in the tank. Powerful and quick action of the heating elements to prevent the temperature from dropping when the product is put into the tank. A 15 litre tank, equipped with a safety gas valve controlled by an electronic card with a class J thermocouple, allowing temperature regulation up to 190°C. Safety guaranteed by a thermocouple kept active by the pilot burner flame. Signalling on the display of the intervention of the safety thermostat. The melting cycle ensures electronic control of the oil heating intermittently programmed both during the oil heating phase (if a solid grease is used) and during the temperature maintenance phase. Software that guarantees the exact reaching of the set temperature, avoiding thermal stress to the oil and oxidation. Display to show the temperature of the oil in the tank in real time. Timer function to alert the user with a buzzer when the preset cooking time is reached. Stainless steel pan and tank with rounded edges sloping towards the drain hole connected to a stainless steel bowl to collect the oil. Oil drains from the tank via a tap into an internal collection basin equipped with a filter. Steel baskets coated with a layer of protective material and stainless steel basin cover supplied. A basin with stainless steel filter provided. Moulded AISI 304 stainless steel

worktop for easy cleaning. AISI 304 stainless steel front cover. Cold-forged stainless steel basin. Laser-cut top finish to ensure a "head-to-head" coupling of tops and binding of tops to each other. Tested with methane or LPG gas according to user requirements. Height-adjustable stainless steel feet.

### Dimensions

Dimensioni esterne	400x700x850 mm
