

Cod: 4432

Electric Convection Oven with Grill and Humidification 4 baking trays / 1/1 GN grids

Description

Ventilated electric convection oven with grill and humidification. Electric grilling is a simple and healthy cooking method that allows you to cook without fat all those foods that are usually prepared on the grill: kebabs, cutlets, chopped vegetables and also sausages, bacon, ribs. This oven also makes it easier to make recipes that involve gratinating of food: potato flans, timbales, semolina au gratin or gnocchi alla romana. The high heating power of the motor and the GRILL function (always ventilated) shorten cooking times, enhancing the browning and fragrance of food without stressing it.

Dimensions

Dimensioni esterne	784x752x634 mm
--------------------	----------------

Technical data

Alimentazione	Electric
Frequenza	60 Hz
Motori	one-way
Peso	52 kg
Potenza Elettrica	5.2 kW
Temperatura d'esercizio	+50 +300 °C
Tipo di cottura	ventilated
Umidificazione	indirect push-button
Voltaggio	400 V
