

Cod: 4466

Electric Convection Oven with Humidification 4 pans power 5,2 kW - guides pitch 83 mm

Description

Excellent technical features and essential design for an oven with a limited footprint but outstanding performance. You will be able to bake cakes and brioche with optimal results thanks to the push-button humidification function and increased heating power. The management of the oven, already extremely intuitive, is further facilitated by the electronic control panel, customisable with no less than 99 programmes, which allows you to bake in 4 stages.

Dimensions

Dimensioni esterne	784x752x634 mm
