**Electric grill with open compartment 10.8 kW 80x90x85h cm**

## **Description**

Stainless steel frame. Knobs made of athermal material with functional silk-screen printing on edge. Heating by means of heating elements with AISI 304 sheathing, which work in air and are suitable for the temperatures to which they are subjected (400°C). The heat load of the heating elements is such that heat exchange is only towards the food to improve cooking and energy saving. Safety thermostat with automatic reset to protect the heating elements. Energy regulator that adjusts the ON-OFF frequency of the heating elements. The maximum continuous operation position is useful in the cleaning process, as it induces pyrolysis of the fats deposited on the heating elements. AISI 304 cold-pressed water tank with drain hole. The water improves the quality of the cooked food and conveys cooking fat to the drain. Water filling and topping-up tap positioned on the dashboard. Tank drain positioned on the dashboard and operated by a lever. 2 mm thick moulded AISI 304 stainless steel worktop with rounded edges for easy cleaning. Front, side and rear panelling in stainless steel. Laser-cut top finish to ensure a "head-to-head" joint and binding of tops to each other. Height-adjustable stainless steel feet

## Dimensions

Dimensioni esterne	800x900x850 mm
