

Cod: 109550011202721

1 basin gas fryer on cabinet capacity 22 lt S/90 40x90x85h cm with electronic controls

Description

Stainless steel frame. Knobs made of athermal material with functional screen printing on the edge. Oil heating by means of combustion-optimised stainless steel burners equipped with an in-tank heat exchanger. Powerful and fast action of the heating elements to prevent the temperature from dropping when the product is fed into the tank. A 22 litre tank, equipped with a safety gas valve controlled by an electronic card with a class J thermocouple, which allows temperature regulation up to 190°C. Safety guaranteed by a thermocouple kept active by the pilot burner flame. Display signalling of safety thermostat intervention. The melting cycle ensures electronic control of the oil heating intermittently programmed both during the oil heating phase (if a solid fat is used) and during the temperature maintenance phase. Software ensures that the set temperature is reached exactly, preventing thermal stress to the oil and oxidation. Display to show the temperature of the oil in the tank in real time. Timer function to alert the user with a buzzer when the preset cooking time is reached. Stainless steel pan and bowl with rounded edges sloping towards the drain hole connected to a stainless steel basin to collect the oil. Oil drains from the tank via a tap into an internal collection basin equipped with a filter. Steel baskets coated with a layer of protective material and stainless steel basin cover supplied. A basin with

stainless steel filter provided. Moulded AISI 304 stainless steel worktop for easy cleaning. Front cover in AISI 304 stainless steel. Cold-forged stainless steel basin. Laser-cut top finish to ensure a "head-to-head" coupling of tops and binding of tops to each other. Tested with methane or LPG gas according to user requirements. Height-adjustable stainless steel feet.

Dimensions

Dimensioni esterne	400x900x850 mm
