

Cod: 550

Ice cream maker Capacity 4-12 litres with air condensation

Description

Ice cream machines with a capacity of 4-12 litres with air condensation. Typical buyers of combination machines are:- Premises with small workshops that cannot install more than one machine;- Those who wish to develop a specific recipe for each individual flavour;- Pastry shops, ice cream parlours, dairies, hotels, camping sites, sports centres, recreation centres, large canteens of public schools, administrations, holiday camps, hospitals, barracks, factories, etc., for which the daily sale or administration of ice cream reaches interesting quantities.
