

Cod: 5887

Trolley with sliding hooks

Description

Trolley designed for transporting quarters and pieces from the unloading area to the inside of the cold store, with direct insertion on the guideway by means of a safety tie. Made with profiles suitable for large capacities and mounted on 200 mm diameter wheels, it is particularly robust and safe, thanks also to the hook locking system, which prevents the hanging quarters from sliding and keeps the load distribution balanced. It is made to measure and with a load capacity according to the user's needs.
