

Cod: 765

Wood sheeter with rollers width 400 mm

Description

The machine presented is designed to obtain the desired sheet thickness or pizza. It solves the problems of small and medium production. The system of use makes the machine extremely versatile and practical, having only the thickness adjustment. Various thicknesses from zero to 7.5 mm can be obtained for all machines, both for sheet and pizza. It is therefore possible to roll out dough in all widths from 22 cm, 25 cm, 40 cm and 50 cm. Made of stainless steel and aluminium structure with wooden cylinders for a homemade dough sheet. The machine has a high degree of reliability while the accident prevention systems and finishes complete the pleasant appearance and indispensable safety for the operation.

Dimensions

Dimensioni esterne	750x450x450 mm
