

Cod: 1327

Automatic Filling-Dosing Machine

Description

Ideal machine for filling with constant dosing: croissants, krapfen, cream puffs, cannoli and the like, with considerable labour savings. Equipped with selector for continuous or intermittent service, with electronic board to ensure reliability and ease of use. Low-voltage electrical controls and accident-prevention systems in compliance with the law. Removable hopper and filling unit for easy cleaning of parts in contact with the product. It is equipped with a set of 4 stainless steel, interchangeable spouts. In all models, dosing adjustment is mechanical with a graduated index. Delivery ranges from 1-30 g.
