

Cod: 993

Bread-forming machine 2 rollers length 500 mm

Description

These bread-forming machines solve the problem of bakeries where space is limited. They are made of duralumin and steel and the rollers are ground and chrome-plated to a thickness. They are equipped with two very strong and durable felts. They are mounted on four swivelling wheels and have a return system for the rolled pieces. With the machine in motion, one switches from the rolling process to the forming process by operating a special control on the front of the machine. They are equipped with an accident-prevention device.

Dimensions

Dimensioni esterne	820x900x1200 mm
Dimensioni rulli	500 mm

Technical data

Peso	155 kg
Potenza Elettrica	0.75 kW
