

Cod: 5721

## Automatic citrus juicer 20 - 25 oranges/minute

### Description

Automatic machine with manual loading, which produces a natural orange juice, to enjoy all the benefits of vitamin C. Completely automatic, easy to handle, the machine does not squeeze the orange shell, and thus allows a natural juice to be obtained without any residual acidity. The machine also allows a high yield because it extracts the juice by keeping the pulp in the orange bark itself. It uses 2 waste storage containers, which, considerably increases its working autonomy. The machine, guarantees the user, simple operation and quick and easy cleaning.

### Dimensions

Dimensioni esterne	400x300x780 mm
--------------------	----------------

Dimensioni imballo

500x495x910 mm

### Technical data

Alimentazione	Electric
Frequenza	50 Hz
Peso	38 kg
Potenza Elettrica	0.2 kW
Produttività	1500 pz/h
Voltaggio	230 V
