

Cod: 5721

Automatic citrus juicer 20 - 25 oranges/minute

Description

Automatic machine with manual loading, which produces a natural orange juice, to enjoy all the benefits of vitamin C. Completely automatic, easy to handle, the machine does not squeeze the orange shell, and thus allows a natural juice to be obtained without any residual acidity. The machine also allows a high yield because it extracts the juice by keeping the pulp in the orange bark itself. It uses 2 waste storage containers, which, considerably increases its working autonomy. The machine, guarantees the user, simple operation and quick and easy cleaning.
