1500x700 mm**

## Description

### **Professional mini cold room**

The mini cold room allows you to add extra space compared to the traditional refrigerator to keep cooked and raw food fresh. The capacity varies depending on the model. You can also choose between mini cold rooms with built-in motor and cold rooms without motor.

### **How the mini cold room works**

The mini cold room consists of a blind entry door and a stainless steel floor, which is resistant to low temperatures and compatible with food contact. Inside it is possible to insert various grids to position the food to be frozen and deep-frozen.

### **Temperatures and Capacities Professional Mini Cold Storage Cell**

The mini cooler is suitable for refrigeration, with positive temperatures between 0°C and +8°C. At this temperature it is possible to store many fresh foods such as vegetables, cold cuts, meat. The capacity is 1400 litres. The mini cold rooms can also already be equipped with an internal motor for refrigeration or be prepared to integrate an external motor. The gas used for cooling is type R452A.

## **Cleaning Mini Cold Store**

The mini cold room is equipped with an automatic defrosting system. The interior is made of stainless steel, a material compatible with food contact according to current regulations, and can be cleaned with a soft cloth to remove water with a non-aggressive dishwashing detergent.

## **Mini Cold Store on Ristoattrezzature**

All professional cold rooms in our catalogue are CE-marked.
