

Cod: 3300790

**Table on stainless steel legs with base and splashback depth 700 mm
400x700 mm**

Description

The Cutlery/Glasses Dryers are part of the kitchen equipment dedicated to the washing and preparation of the mise en place at the table. Cutlery/Glasses Dryer Features The professional cutlery drier is a machine suitable for the preparation of cutlery, both silver and stainless steel, and glasses for table service. It contains a natural granulate inside that absorbs residual moisture on cutlery and glasses, drying and polishing them in a few minutes. The basket holds a variable number of cutlery items, depending on the model chosen, and automatically immerses itself inside the tub containing the vibrating hot granulate. Some models are also equipped with a UV lamp that reduces the bacterial load on the cutlery after washing. The material used is stainless steel, and the inner tub is coated with resin suitable for contact with food. Why choose a professional glass dryer? Professional glass and cutlery dryers save considerable preparation time for the mise en place and ensure clean and bacteria-free cutlery and glasses for diners. The cutlery/glass dryer is also effective against limescale and stubborn grease. Cutlery/Tumbler Dryer on RistoTools All cutlery/glass dryers sold on Ristoattrezzature are CE-marked.
