900x700 mm**

Description

Professional Object Washers Professional clothes washers are stainless steel cabinets for cleaning and sanitising kitchen utensils. They are useful in butcher shops, hotels, restaurants, bakeries and pastry shops, to quickly and thoroughly wash all the utensils used for food preparation. How Professional Object Washers Work The washer-dryer is a machine equipped with electronic controls, with internal baskets in which to place all the utensils used in the kitchen for cleaning. It can clean various types of containers, cutlery, plates, and parts of household appliances that can go in the dishwasher. The dimensions and capacity vary from model to model. Stainless steel is the material of choice for the washer due to its resistance to water oxidation and durability. Operation is electrical. Object washers on Ristoattrezzature All object washers in our catalogue are CE-marked.
