

Cod: 1273

## Croissant moulder with trolley

### Description

Forming machine for wrapping croissants. Processes any type of dough well, without mistreating it. Thanks to a special wrapping system and the adjustment of the stainless steel cylinder, it works variable thicknesses from 2-7 mm. and can also produce mini-croissants. The load is at the front while the wrapped croissants come out at the back and are collected on a baking tray. Production of about 800 pieces/hour. Completely stainless steel. Ideal for combination with a croissant cutter.
