

Cod: 42660905

Freezer cell height 2200 mm - price excluding motor 5200x5800x2200h mm

## Description

The professional can opener is a device suitable for opening packaged products in the kitchen. In particular, it is useful for opening tin and metal packages. Features of Back Cabinet Openers The professional can opener is equipped with blades and gears that can open metal packaging safely, without producing fragments and without creating dangerous contact between the sharp edges and the skin. The can openers are made of hardened steel, a material suitable for food contact according to current regulations. The blade is also pre-treated with an antibacterial treatment, which is also used on the black-coated upper lever. The professional can opener is easy to use and minimises physical effort to open up to 40 cans per day. Can openers on Ristoattrezzature Within our catalogue you can find professional can openers with manual operation, which are useful in all catering businesses. All can openers are CE-marked.
