

Cod: 1282

Automatic bread divider hexagonal cut 37 divisions Electronic

Description

The automatic hexagonal-cutting divider is a fully automatic mechanical type. When the machine cover is lowered, the pressing and cutting cycle begins. In five seconds it completes the cycle automatically. The knife and all parts in contact with the dough are made of stainless steel. The pistons are made of Derlin to prevent sticking of the dough. It is complete with two pressure regulators: the first mechanical to vary the pressing force of the dough; the second electronic to adjust the pressing time of the dough, always obtaining excellent pressing results even with delicate types of dough. Low-voltage electrical system to CE standards.

Dimensions

Dimensioni esterne	540x630x1100 mm
Pistone	61 mm

Technical data

Peso	300 kg
Potenza Elettrica	0.75 kW
