

Cod: 3240633

Stainless steel table on legs and splashback depth 600 mm 1900x600 mm

Description

Hot cream dispensers Hot cream dispensers are useful machines for dispensing hot creams, jams and fillings. They are made of stainless steel, with a plastic container compatible with food contact according to current regulations. Creams or drinks can be placed inside the container, to be dispensed through the convenient tap, operated by a lever. The hot cream dispenser has a compact shape and small dimensions, and can be used on any bar counter or table for easy dispensing of creams and drinks such as tea and infusions. Hot cream dispenser: how it works The hot cream dispenser is equipped with an adjustable thermostat that keeps the contents of the plastic tub at the desired temperature. In this way, the amount of product dispensed can be controlled at each dispense while maintaining a constant heat, without dispersion. Dispensing is controlled via a lever on the front of the cream dispensers. This also prevents product wastage, which can thus be fully controlled by the user of the dispenser. The cream dispenser can also be placed in the breakfast room to allow hotel and hotel guests to dispense their own creams. Hot cream dispensers on Ristoattrezzature All hot cream dispensers for sale on Ristoattrezzature are CE-marked.
