

Cod: 1284

2-cylinder refiner

Description

Robust and reliable 2-cylinder refiner. The gears and worm screws are in an oil bath, made of high-strength materials. The cylinders are made of light-coloured granite, one of which is horizontally oscillating for perfect refining of the product. This model with 2 cylinders mounts rollers 300 mm wide. Removal of the scrapers and hopper for cleaning is simple and practical. It is complete with accident prevention devices in accordance with the law. The collection tank and loading hopper are made of stainless steel.
