

Cod: 3250789

Stainless steel table on legs and splashback depth 700 mm 700x700 mm

Description

Professional Coffee Thermos The professional coffee thermos is a container, usually made of stainless steel, used to store liquids such as coffee, tea and hot drinks even hours after preparation. It is commonly used in everyday life, but in bars, breakfast rooms, cafeterias and tea rooms it is an essential accessory for continuing to serve hot drinks while maintaining a constant temperature thanks to an internal heating system. The coffee dispenser is equipped with a spout with a cap from which the drink can flow quickly, without coming into direct contact with the liquid. The base and lids are made of plastic, while the body is made of stainless steel, a material suitable for contact with food according to current regulations. How to clean the coffee thermos Once the thermos has cooled down and is empty, it can be cleaned with hot water inside or in a dishwasher. It is advisable to use a non-aggressive kitchen detergent. Coffee Thermos on Ristoattrezzature All Coffee Thermos in our catalogue are CE-marked.
